Abuja, Nigeria | +234 701 752 2777 | komgbendajoseph6@gmail.com | linkedin.com/in/joseph-komgbenda-38bb41287

PROFESSIONAL SUMMARY

A highly motivated Aerospace Engineering graduate from the Air Force Institute of Technology (AFIT), Kaduna, with a Bachelor of Engineering (B.Eng.) in Aerospace Engineering and a CGPA of 3.89/5.00. Completed nine months of industrial training with the Nigerian Air Force, gaining practical exposure to scheduled aircraft maintenance, borescope inspections, hydraulic and fuel systems, and engineering support across six fixed- and rotary-wing aircraft platforms. Proficient in a robust suite of CAD and CAE software—including CATIA V5, ANSYS, and SolidWorks—with practical experience in aerospace component modeling, structural analysis, and conceptual design. Recognized for a strong work ethic, technical adaptability, and a commitment to aviation safety. Seeking an entry-level Aircraft Maintenance or Graduate Engineering position to apply technical knowledge while continuing to develop as an aerospace engineer.

KEY HIGHLIGHTS

- **Academic Excellence:** Graduated with a B.Eng. in Aerospace Engineering (CGPA: 3.89/5.00) from AFIT.
- **Hands-on Maintenance:** Completed 9 months of industrial training with the Nigerian Air Force, executing scheduled maintenance tasks across six different aircraft platforms.
- **Design & Simulation:** Proficient in CATIA V5, ANSYS, SolidWorks, and SpaceClaim for aerospace CAD modeling and structural simulation.
- **Project Engineering:** Conducted advanced stress analysis on twin-turboprop structures and contributed to the conceptual design of the Carter Fusion 260 business aircraft.

PROFESSIONAL EXPERIENCE

Engineering Intern (SIWES / Industrial Training)

January 2025 – June 2025

307 Executive Airlift Group, Nigerian Air Force

- Executed routine 400-hour and 600-hour scheduled inspections on Beechcraft King Air 300 aircraft, completing the full maintenance cycle at least twice in accordance with approved procedures.
- Performed 200-hour maintenance inspections on Hughes 369H helicopters on multiple occasions.
- Assisted with borescope engine inspections to support aircraft condition assessment and preventive maintenance.
- Supported landing gear inspection, removal, installation, and functional checks, alongside hydraulic system bleeding, fuel system servicing, and lubrication.
- Maintained engineering documentation and maintenance records in accordance with established aviation practices.

Engineering Intern (SIWES / Industrial Training)

July 2024 – December 2024

431 Engineering Group, Nigerian Air Force

- Observed and assisted with scheduled and unscheduled maintenance activities on Dornier Do 228, Super Mushshak, and Diamond DA aircraft.
- Supported aircraft inspections, servicing, troubleshooting, and routine maintenance operations collaboratively with multidisciplinary engineering teams.
- Assisted in preparing engineering documentation and maintenance records while strictly observing safety procedures.

CAD Engineering Intern Remote Dwello Aerospace

- Developed detailed CATIA V5 models of the GE90 and Eurojet EJ200 turbofan engines using engineering drawings and reference material.
- Produced accurate three-dimensional part and assembly models while applying aerospace engineering design principles.
- Presented completed models during technical review sessions, strengthening proficiency in aerospace CAD modeling and engineering visualization.

ENGINEERING PROJECTS

Final Year Project: Stress Analysis of a Twin-Turboprop Structure

- Conducted a comprehensive stress analysis of propeller-induced asymmetric loads and vibration on a light twin turboprop fuselage structure.
- Adapted the actuator disk method for wing structural analysis, specifically modeling aerodynamic behaviors for co-rotating engines.

Carter Fusion 260 Business Aircraft Concept

- Collaborated within a multidisciplinary engineering team on the conceptual design of a business aircraft.
- Contributed to aircraft configuration development, performance discussions, and preliminary engineering design activities.

EDUCATION

Bachelor of Engineering (B.Eng.) in Aerospace Engineering

Graduated: July 2026

Air Force Institute of Technology (AFIT) | Kaduna, Nigeria

- **CGPA:** 3.89 / 5.00
- **Relevant Coursework:** Aircraft Structures, Aircraft Design, Aircraft Propulsion, Aerodynamics, Flight Mechanics, Airworthiness, Aircraft Maintenance, Engineering Materials.

TECHNICAL SKILLS

Aircraft Maintenance: Scheduled Inspections (200h/400h/600h), Servicing, Preventive Maintenance, Hydraulic/Fuel Systems, Landing Gear, Borescope Inspections.

Engineering Software: CATIA V5, SolidWorks, ANSYS (Workbench, Fluent), SpaceClaim, FreeCAD, Microsoft Office Suite.

Programming & IT: Python, Linux OS.

Engineering Competencies: Aircraft Structures, Airworthiness Principles, Aviation Safety, Technical Documentation, Engineering Drawing Interpretation, Problem Solving.

AIRCRAFT PLATFORMS & CERTIFICATIONS

Platforms: Beechcraft King Air 300 | Hughes 369H | Dornier Do 228 | Bell UH-1 Iroquois | Super Mushshak | Diamond DA Series

Certifications: Rolls-Royce Aerospace Engineering Program | Dwello Aerospace CAD Internship | Aerospace Work Experience Program | Time Management Certification
